MANUFACTURING

One Source for All Your Machining Needs

For complete manufacturing support, MB Manufacturing is now supplying machined parts to customer specification. We have recently added a CNC lathe and Full Fourth Axis to our CNC mills.

We have extensive machining capabilities using various materials.

- Composites
- Brass
- Plastics
- Aluminum (extrusions, bar and plate, castings)
- Titanium grade 1 and 2
- All forms of steels (0-1, A-2, etc.)
- All grades of stainless steel (303, 304, 316, 416, etc.)

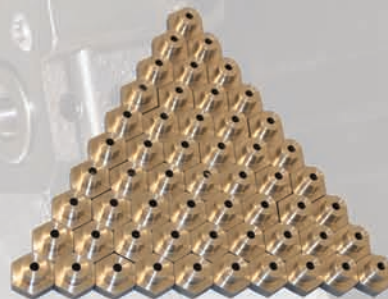

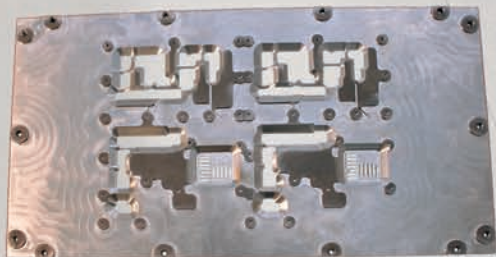

Machines in our facility include:

- CNC machining
- 3 axis
- 4th axis
- Lathe
- Grinding
- EDM Wire and sinking
- Cold Sawing all Ferrous and non-Ferrous Metals/Composite sheet cutting up to 6 ft. x 8 ft.

Using the Faro we confirm our precision to +/- .0002" over 4 feet.

We also offer:

- Aluminum anodizing
- Irriditing
- Impregnating
- Painting
- Tool steel hardening
