

**MB Manufacturing is proud to announce, we now offer  
Dedicated Solid Titanium Solder Nozzles for Seho and  
Pillar House Selective Solder machines.**

Our innovative designs allow even flow through a variety of apertures. We also offer shutters for fine flow adjustments.

We use an ultra-pure grade of titanium to eliminate the possibility of solder contamination. With over 25 years of expertise in PCB soldering, we have established in house design guidelines allowing us to fabricate your dedicated solder nozzles right the first time.
